Experience

2022 - Present

Freelance – Self-employed

AI & Data Analytics Consultant and Developer

Leveraging my extensive experience in AI and Data Science, I provide freelance advisory services to startups seeking to leverage AI to optimize their operations and drive growth. I have a proven track record of helping businesses identify and implement AI solutions that align with their strategic goals and achieve tangible results.

2012 – Present

Freelance – Self-employed

Web Developer

Embarked on a web development career as a freelance PHP developer, later transitioning to focus on Q2A development. Established a reputation for creating robust question and answer communities and orchestrating seamless multi-integrations for Q2A, WordPress, MediaWiki, and various other platforms.

2013 – 2019

Self-employed

Funded QA-Themes.com, Q2A Developer

Founded QA-Themes, a business specializing in Question2Answer, an open-source PHP-based Q&A framework. I've created, customized and maintained numerous communities, developed and designed open-source plugins and themes, and developed multi-framework integrations. Successfully exited the business to pursue graduate studies.

2008 – 2010

Freelance

Software Developer

Launched my career as a freelancer, crafting small software solutions for businesses using VB and C# on the Windows OS. Additionally, I designed and developed websites, serving as the webmaster for several small businesses.
